Partition table entries are not in disk order.

Command (m for help): The partition table has been altered.
Calling ioctl() to re-read partition table.
Re-reading the partition table failed.: Device or resource busy

The kernel still uses the old table. The new table will be used at the next reboot or after you run partprobe(8) or kpartx(8).

Please reboot system and execute ./resize2fs_once.

On écrit le code hello.c:

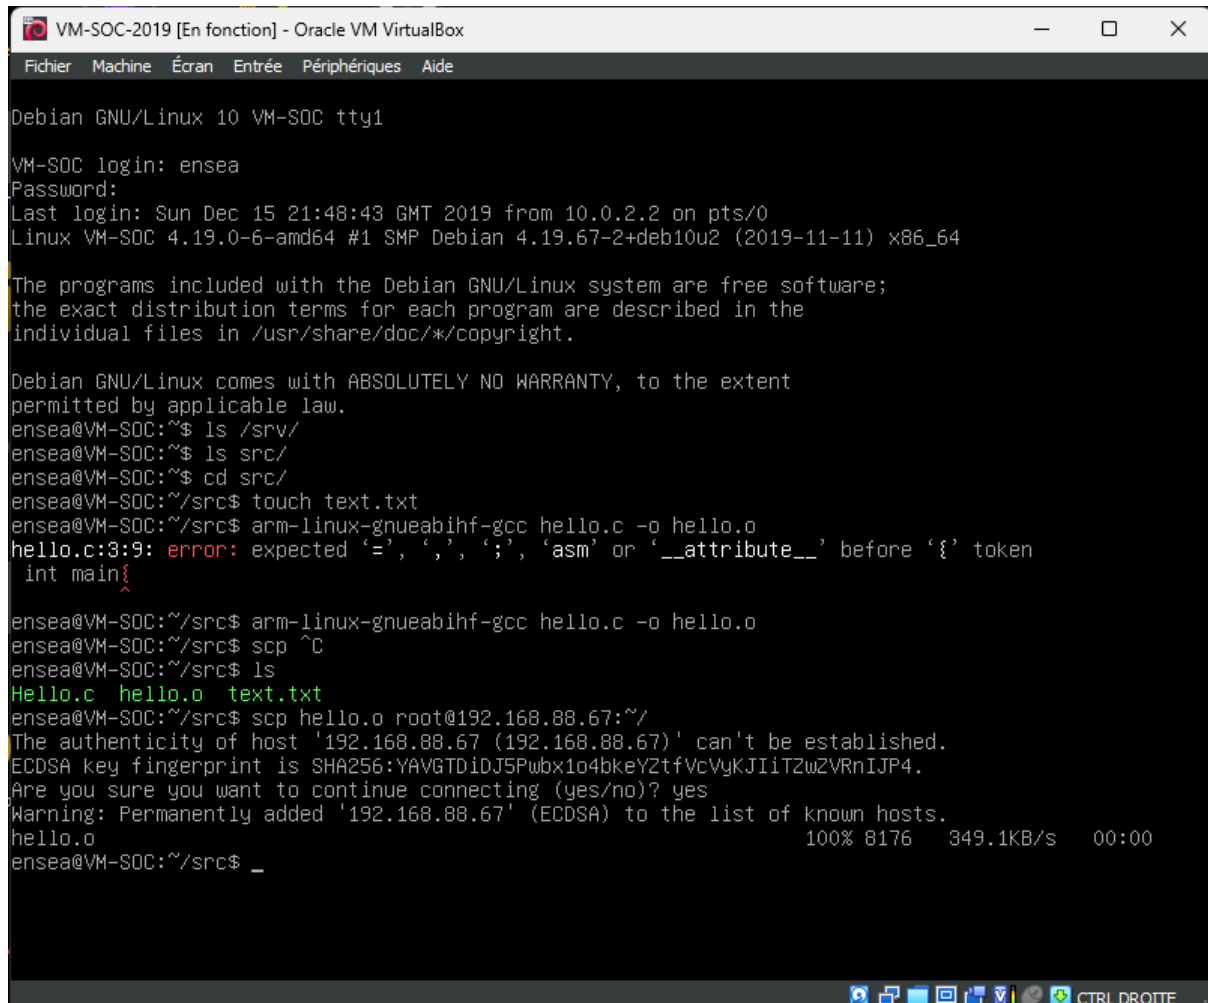

```

#include <stdio.h>

int main(int argc, char *argv[]){
    printf("Hello World\n\r");
    return 0;
}

```

On compile sur la VM puis on envoie le programme sur la carte:
